COMMENTARY

Investor Profile

Mobius Investment Trust plc has no required minimum holding period and is designed for long-term investment (at least five years). It is intended for both institutional and retail investors. As MMIT invests in equities it may therefore be subject to volatility. This requires an elevated risk tolerance and capacity.

Investment Objective

The Company's investment objective is to achieve long-term capital growth and income returns predominantly through investment in a diversified portfolio of companies exposed directly or indirectly to emerging or frontier markets.

During the period, geopolitical tensions escalated following coordinated military strikes by the US and Israel on Iran, with subsequent retaliatory actions reported across the region, including in the UAE, Qatar, and Kuwait. These developments contributed to disruptions in global energy markets, including increased volatility in oil prices, particularly given the strategic importance of the Strait of Hormuz as a key transit route for global supply. The duration and ultimate impact of these developments remain uncertain. Against this backdrop, markets remained highly volatile, with the MSCI EM Mid Cap Index (Net TR) declining by over 9% during the period in GBP terms.

In this environment, the Mobius Investment Trust's (MMIT) net asset value (NAV) and share price declined by 7.1% and 6.1% respectively, outperforming the MSCI EM Mid Cap Index (Net TR) by 2.0%. The largest contributors to March performance were Taiwanese IC design house ASPEED (+0.3%), Taiwanese speciality materials supplier Elite Material (+0.3%), and Taiwanese testing equipment maker Chroma ATE (+0.3%). The largest detractors to March performance were Taiwanese electronic ink producer E Ink (-1.8%), Korean atomic force microscope provider Park Systems (-1.1%), and Korean medical aesthetics device manufacturer Classys (-1.1%).

At the time of reporting, the portfolio had no direct exposure to the Middle East or to oil and gas producers. However, second-order effects of the conflict have been observed across global markets, including in Asia, where the portfolio is predominantly invested. We continue to monitor developments closely.

Opportunities

- + Focus on dynamic small and mid-sized companies in many of the fastest growing economies in the world
- + Fundamental bottom-up research process identifies resilient business models which are undervalued and mispriced
- + Lower ESG standards in emerging and frontier markets offer a unique opportunity for active engagement approach
- + Create value by delivering a clear ESG pathway for our portfolio companies
- + Concentrated portfolio allows a customised engagement strategy for each company

PORTFOLIO MANAGER

Carlos von Hardenberg
Founder & Portfolio Manager

Carlos von Hardenberg founded MCP Emerging Markets in 2018 and has been the portfolio manager for the strategy since inception.

Risks

- MMIT pursues an active management style. Its performance may therefore deviate considerably from that of a comparable market return
- Pronounced fluctuations in price are characteristic of emerging and frontier economies. Other characteristics include specific risks such as lower market transparency, regulatory hurdles, illiquidity of markets as well as political and social challenges
- Investments via Shanghai or Shenzhen Stock Connect are subject to additional risks, quota limitations, custody risk, clearing/settlement risk and counterparty risk
- Focusing intentionally on stocks in small and medium cap companies may entail additional risks (e.g. lower liquidity)
