

octopus renewables infrastructure trust

Factsheet – 30 September 2026

This is a marketing communication. Capital at risk. The value of investments may go down as well as up, and investors may not get back the full amount invested.

Octopus Renewables Infrastructure Trust plc (the "Company" / "ORIT") is an investment company focused on providing investors with an attractive and sustainable level of income returns, with an element of capital growth, by investing in a diversified portfolio of renewable energy assets across Europe, the UK and Australia.

£323m	61.3p	£449m	85.2p	10.2%	1.56p	6.23p
Market capitalisation	Ordinary share price	Unaudited NAV	Unaudited NAV per share	Dividend yield[1]	Q3 2026 Dividend declared	FY 2026 Dividend target[2]

Q3 2026 Highlights

- **September:** ORIT released its interim results for the six months ended 30 June 2026, reporting revenue of £67.2 million, 3% ahead of budget, EBITDA of £42.1 million, 6% ahead of budget, and dividend cover of 1.38x. NAV total return was -5.0%, primarily reflecting the onshore wind energy yield review, lower long-term power price forecasts and higher discount rates, while share price total return was 13.7% for the six-month period.
- **September:** ORIT won the AIC Shareholder Communication Award for Best ESG Communication, recognised for making its ESG communications clearer and more accessible, while showing how its approach translates into action across the portfolio.
- **Post period:** ORIT announced the conditional acquisition of Barnsdale Solar Park, a 55 MWp solar project in West Yorkshire currently under construction. The project has a fixed-price, CPI-linked, CfD running to 2041, with completion subject to the relevant requirements being met ahead of the expected March 2027 CfD commencement deadline.
- During Q3 2026, no shares were repurchased by ORIT, leaving the total spent as at 30 September 2026 at c. £26m out of its total £30m buyback programme.

Dividends

A dividend of 1.56p per share (or £8.2 million) was declared in respect of Q2 2026 and paid on 1 September 2026.

A dividend of **1.56p per share has been declared in respect of Q3 2026**, payable on 30 November 2026 to shareholders on the register on 13 November 2026.

In line with its progressive dividend policy, the Company is targeting a dividend of **6.23p** for **FY 2026**[2], an **increase of 1.0%** over FY 2025. This marks the fifth consecutive year that ORIT's Board has increased its dividend target.

Investment Policy

The Company intends to invest both in a geographically and technologically diversified spread of Renewable Energy Assets and, over the long term, it is expected that:

- Investments located in the UK will represent less than 50% of the total value of all investments[3].
- Investments in any single country other than the UK will represent no more than 40% of the total value of all investments.
- Investment in (i) onshore and offshore wind farms and (ii) solar PV parks will each not exceed 60% of the total value of all investments.

Investments that are under development will represent less than 5% of Gross Asset Value[4].

Our full Investment Policy is available here and on our website.

A decision to invest in ORIT should consider all its investment objectives and risks as described in the Annual Report and Key Information Document. Please read these before taking any investment decision. Copies can be obtained from: https://octopusrenewablesinfrastructure.com, orit@octopusenergygeneration.com.

This is a marketing communication. Capital at risk.

1,261 GWh
Potential annual renewable electricity generation[5]

352k
Estimated annual equivalent number of homes that could be powered by clean energy[5]

341k
Estimated annual equivalent tonnes of carbon that will be avoided[5]

1.4m
Estimated annual equivalent no. of new trees required to be planted to avoid the same carbon[5]

ORIT's impact goal: accelerate the transition to net zero

ORIT classifies itself as an impact fund with a core objective to accelerate the transition to net zero through its investments - building and operating a diversified portfolio of renewable energy assets. As a Sustainable Finance Disclosure Regulation ("SFDR") Article 9 product, ORIT targets 100% EU Taxonomy-aligned investments, with a set minimum threshold of 85%, assessed by the Investment Manager with the support of external tools, but not formally audited or independently verified. This enables its investors to contribute to the 'Just Transition', encouraging wider and fairer distribution of benefits as the world switches to clean energy. ORIT's Impact Strategy reflects its culture, values and activities through three lenses: Performance, Planet and People – ensuring ESG risk integration and maximising environmental and social benefits beyond climate mitigation. **Note: The decision to invest should consider all characteristics and objectives of the fund as described in its legal documentation.**

SFDR Article 9

£695k community benefit funds budget

£408k FY 2026 dedicated impact budget

Performance:

- Following a review of the curtailment methodology at the German wind farm, Leeskow, the site achieved over 1.3 GWh of increased compensation for economic curtailment this year.
- Our French solar portfolio successfully complied with new negative price regulations ahead of the April 2026 deadline, securing c.€110k in compensation for curtailment during negative pricing events.

Planet:

- ORIT partners with The Good Bee Company to host beehives at Chisbon Solar Farm. Beyond boosting site biodiversity, the company engages communities through school workshops. This quarter, students participated in wildflower seed making, launched honey enterprises with honey from ORIT's assets to raise funds for good causes, and built school pollinator gardens - inspiring the next generation of environmental stewards.

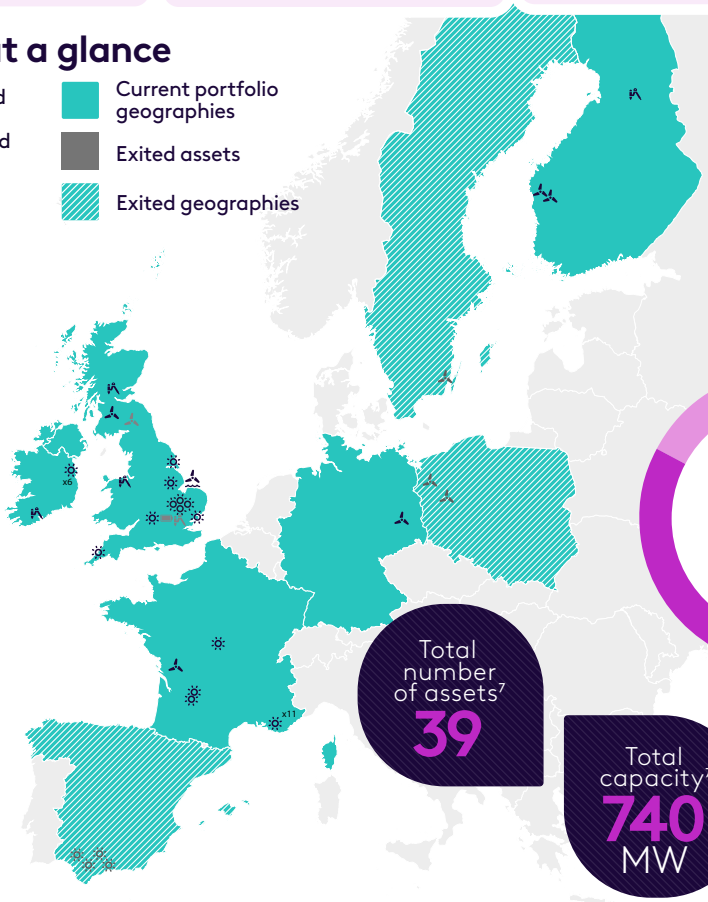

People:

- Young Climate Warriors continued using ORIT's £25,000 grant to empower youth across the UK. As of Q3 2026, the partnership remains firmly on track to meet its annual targets, including training 60 ambassadors, delivering 80 assemblies, and running 40 "Climate Change in-a-Box" sessions. The overall target of reaching over 14,000 children has already been achieved.

Portfolio status

By having committed to or invested in 14 sites at the construction stage, ORIT is actively participating in adding new capacity to the sector, having built 517 MW* to date.

** This includes the exited Polish wind farms (59 MW) and Swedish wind farm (48 MW), and the six Irish solar sites (including the conditional acquisition, Irishtown - 274 MW) for which ORIT actively provided oversight of the construction.*

Acquired at construction stage

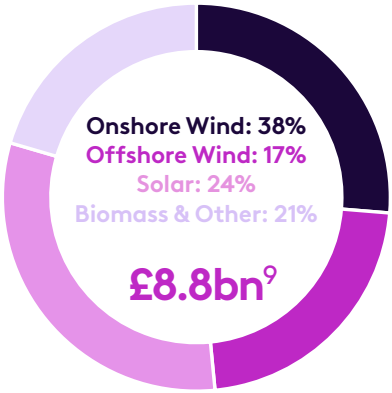

octopus energy generation

Octopus Energy Generation, ORIT's Investment Manager and part of Octopus Energy Group, is driving the renewable energy agenda by building green power for the future.

ORIT benefits from its leading specialist renewable energy fund management team, which was set up in 2010 and invests in renewable energy assets and broader projects helping the energy transition, across operational, construction and development stages.

Key risks

An investment in ORIT will place capital at risk. The value of investments, and any income, can go down as well as up, so investors could get back less than the amount invested. Neither past performance nor any forecasts should be considered a reliable indicator of future results. Actual performance will, inter alia, depend on factors such as wholesale power prices, power purchase agreements, regulatory environment, government incentives, exchange rates, inflation, grid connections, asset concentrations and site performance.

ORIT will invest in Renewable Energy Assets which are in development or under construction and, therefore, may be exposed to certain risks, such as permit rejection, lack of grid capacity, cost overruns, construction delay and construction defects, which may be outside ORIT's control. Investment valuation is based on financial projections for the Company's relevant Renewable Energy Assets. Projections will primarily be based on the Investment Manager's assessment and are only estimates based on assumptions made at the time of the projection.

1. Dividend Yield is calculated by dividing the target annual dividend per share of 6.23p for FY 2026 by the LSE closing share price as at 30 September 2026. **This is not a reliable indicator of future performance.**
2. **The dividend targets stated are targets only and not profit forecasts.** There can be no assurance that these targets will be met, or that the Company will make any distributions at all and they should not be taken as an indication of the Company's expected future results. The Company's actual returns will depend upon a number of factors, including but not limited to the Company's net income and level of ongoing charges. Accordingly, potential investors should not place any reliance on these targets and should decide for themselves whether or not the target dividend is reasonable or achievable. Investors should note that references in this announcement to "dividends" and "distributions" are intended to cover both dividend income and income which is designated as an interest distribution for UK tax purposes and therefore subject to the interest streaming regime applicable to investment trusts.
3. For the purposes of this paragraph, the "total value of all investments" shall (i) be valued on an unlevered basis, (ii) include amounts committed but not yet incurred and (iii) include Cash and Cash Equivalents to the extent not already included in the value of investments or amounts committed but not yet incurred.
4. "Gross Asset Value" means the aggregate of (i) the fair value of the Company's underlying investments (whether or not subsidiaries), valued on an unlevered basis, (ii) the relevant assets and liabilities of the Company (including cash) valued at fair value (other than third party borrowings) to the extent not included in (i) or (ii) above.
5. All metrics are calculated based on an estimated annual renewable energy generation of the investment portfolio once fully operational and on the basis of ORIT's equity stake. Metric is based on the latest "P50" yield assumptions for the next available full operational year (calculated biannually for operational assets unless changes to expected yield identified), including degradation that occurs naturally over the assets' lifetimes. Equivalent tonnes of carbon avoided are calculated using the 2021 International Financial Institution's approach for Common Default Grid Emission factors. Reference updated in January 2024 from 2019 to 2021 to reflect most recent emission factors available.Equivalent homes powered by clean energy are calculated based on most recent average household electricity usage values provided by Ofgem (UK) and Odyssee (EU). References and methodology updated in January 2024.Equivalent new trees planted in the UK are calculated based on UK Woodland and Peatland carbon statistics (0.20 tCO2/tree). References updated in January 2024 from 2021 to 2022 to reflect most recent full dataset across sources.
6. Portfolio composition on a total value of all investments basis in line with the Company's Investment Policy as at 30 September 2026. The investments are valued on an unlevered basis and including amounts committed but not yet incurred. Sum may not add up due to rounding.
7. Excludes Irishtown (solar) and Barnsdale (solar) conditional acquisitions.
8. Total debt drawn (short-term and long-term) as a percentage of Gross Asset Value.
9. As at 30 June 2026. Assets under management defined as the sum of Gross Asset Value and capital committed to existing investments and signed (yet to be completed) deals and excludes capital available, yet to be deployed.
10. As at 30 June 2026. Number of countries includes countries of assets under management, countries in which asset investments have been exited, countries of head offices of developer company investments, and countries of presence for OEGEN origination teams.

Disclaimer: Octopus Renewables Infrastructure Trust ("ORIT") is an investment trust and its Ordinary Shares are traded on the premium segment of the main market of the London Stock Exchange. A decision to invest in ORIT should consider all its investment objectives and risks as described in the Annual Report and Key Information Document.
