Fund Managers

Nick Brind
Fund Manager
Nick has co-managed the Trust since launch, he joined Polar Capital in 2010 and has 31 years of industry experience.

George Barrow
Fund Manager
George has co-managed the Trust since 2020, he joined Polar Capital in 2010 and has 17 years of industry experience.

Tom Dorner
Fund Manager
Tom has co-managed the Trust since 2024, he joined Polar Capital in 2023 and has 24 years of industry experience.

Trust Profile

Investment Objective

The Company's investment objective is to generate for investors a growing dividend income together with capital appreciation.

Key Facts

- The only UK-listed Investment Trust solely focused on financials
- Twin objectives of growing investors' dividend income and capital
- A broad, global multi-cap remit
- Large dedicated investment team with over 100 years of experience in the sector

Investment Policy

The Company will seek to achieve its objective by investing primarily in a global portfolio consisting of listed or quoted securities issued by companies in the financials sector operating in the banking, insurance, property and other sub-sectors.

Performance relates to past returns and is not a reliable indicator of future returns.

Source: Bloomberg & HSBC Securities Services (UK) Limited, percentage growth, Net of Fees in GBP terms.

The Net Asset Value (NAV) at launch was 98.0p per ordinary share based on the subscription price of 100.0p per ordinary share and launch costs of 2.0p per ordinary share.

1. Gearing calculations are exclusive of current year revenue/loss.
2. Management fees are charged 80% to capital and 20% to revenue. The management fee is calculated to comprise the sum of two elements: (a) 50 per cent. of the NAV (on a cum income basis); and (b) 50 per cent. of the lower of (i) the Company's market capitalisation (on a mid-market basis) and (ii) NAV (on a cum income basis). Ongoing charges (OCR) are calculated at the latest published year end date. Ongoing Charges are the total operating expenses of the Company expressed as a percentage of the average daily net asset value during the year. The OCR shows the annual percentage reduction in the net asset value as a result of the costs of running the Company. The OCR for the year to 30 November 2024 was 0.85%. The figures are current estimates and may change in the future. Please see the Annual Report and Financial Statements for further information about the calculation of fees.
3. The Historic Yield reflects distributions declared over the past twelve months as a percentage of the share price, as at the date of this fact sheet. It does not include any initial charge and investors may be subject to tax on their distributions.
4. Ordinary share price (TR) is calculated by reinvesting dividends at relevant ex-dividend dates, not taking into account returns shareholders would have received from the subscription shares issued at launch. Please note subscription shares were subject to a single exercise date being 31 July 2017.
5. The MSCI ACWI Financials Net Total Return Index was adopted as the Trust's benchmark in April 2020.
6. A tender offer was carried out on 22 April 2020 following approval to extend the Company's life indefinitely. A further tender offer was carried out on 17 June 2025.

Risk Warning Your capital is at risk. You may not get back the full amount you invested. Please note the Risks and Important information at the end of this document, and the Investment Policy and full Risk Warnings set out in the Prospectus, Annual Report and/or Investor Disclosure Document.

Discount Warning The shares of investment trusts may trade at a discount or a premium to Net Asset Value for a variety of reasons including market sentiment and market conditions. On a sale you could realise less than the Net Asset Value and less than you originally invested. FE Alpha Manager Ratings do not constitute investment advice offered by FE and should not be used as the sole basis for making any investment decision.

Custodian
HSBC Plc is the Depositary and provides global custody of all the company's investments.

Fund Managers' Comments

Market and Trust review

Global financials outperformed broader markets in a month characterised by shifting expectations on central bank easing, along with a pullback in areas most exposed to the AI theme. A resumption of economic data following the reopening of the US government after a shutdown added to market uncertainty.

The MSCI All Country World Financials Index rose 1.2% in November relative to a 0.8% fall in the MSCI All Country World Index. The Trust's NAV rose 2.3% (all figures in sterling terms) with the relative performance supported by an overweight to European banks, continued strength in Asian life insurers (the Trust holds both AIA Group and Prudential) and an underweight in Australia. This was partially offset by weakness in P&C insurance holdings (primarily Beazley following its results), London Stock Exchange Group (LSEG) and the underweight in Berkshire Hathaway.

European banks

European banks continued their outperformance during November with sentiment supported by a positive Q3 results season which led to modest upgrades to earnings forecasts. Along with an improvement in underlying profitability reflecting more normalised interest rates along with solid asset quality, there is evidence of a pickup in loan growth (particularly in Central and Eastern Europe and the periphery). The extent to which loan growth accelerates is set to become a key differentiator as we move into 2026. While some enthusiasm around the theme of German fiscal stimulus has cooled as longer-term ambitions collide with political reality, we are seeing signs of regulatory easing which should continue to support attractive capital distributions (the sector has a total yield of 9% on average including buybacks).

The Bank of England's Financial Policy Committee has lowered the banking sector's minimum capital requirements at a system level by 100bps with an emphasis on introducing reforms to promote growth. This is a material shift in tone towards the sector and we expect similar changes as part of the upcoming ECB High-Level Task Force on simplification, due to be published before the year-end. While the sector has rerated (to 9.6x 2026 EPS), the 34% discount to the broader market remains wider than the historical average despite the improved underlying environment.

Asia

Asian financials outperformed during the month, led by Japan and China. Japanese financials rose 3.6% in November, with the cabinet's approval of a ¥21trn fiscal package providing some clarity on the outlook while the Bank of Japan's comments, particularly in relation to a weaker yen, raised expectations regarding an interest rate increase in December, which would provide additional support to banks' core revenues.

Despite mixed economic trends in China, with weakness in consumption and the real estate sector remaining a drag on growth, the stock market has outperformed this year. Along with a reduction in concerns surrounding geopolitical tensions with the US and enthusiasm around Chinese innovation sectors, the role of government policy and liquidity has been a critical factor (driven by the increased allocation of state insurers to invest in domestic stocks as well as rising retail investor participation). The Trust's exposure to China is primarily through AIA Group and Prudential where results have been supported by strong momentum in new business growth in both mainland China and Hong Kong. Consequently, we see fundamental support to both companies from robust growth drivers along with strong governance, rather than pure participation in a liquidity driven rally.

Stablecoin

We see the rapid growth of stablecoins as a material development for the sector with implications across the payments sector, banks and central banks. Crucially, there has been a shift in the regulatory landscape with the GENIUS Act (passed in July) providing a legislative framework for the issuance and exchange of stablecoins in the US.

For the payments industry, there is potential disruption linked to stablecoin's ability to offer real-time settlement and programmability with B2B payment flows and cross-border likely most affected. However, stablecoin also offers incremental flows to the networks, providing on/off ramps and stablecoin-linked cards.

The banking sector's response to stablecoins, through the issuance of tokenised deposits, offers significant opportunities (the ability to pay interest a crucial distinction from stablecoin) but there are questions around interoperability and it will require broader take-up by banks to create common standards. While it remains too early to assess the ultimate winners and losers, we view the conditions in place for the growing adoption of stablecoin supported by additional legislation (the CLARITY Act is expected to be passed in early 2026). The Trust has started a small position in Coinbase Global, one of the largest crypto exchanges, which, through its partnership with Circle, is positioned to benefit from what in our view is a secular theme.

Outlook

We have been encouraged by recent operating trends which have underpinned the sector's strong relative performance and while there has been some rerating, principally within the banking sector, valuations are not expensive relative to history or the broader market.

Looking into next year, we see continued support from the key themes the Trust has invested in. Within the banking sector, we expect regulatory easing to be supportive for an acceleration in lending, capital return and consolidation. We are likely in the early innings of a 'democratisation of trading and investing' and expect to see more legislation passed, including the EU's Savings & Investment Union, which will provide a tailwind.

Within emerging markets, an easing liquidity environment creates a supportive backdrop while corporate governance reforms, particularly in South Korea, if sustained, provide opportunities for further rerating.

Within diversified financials, we expect to see greater clarity on the issue of data monetisation while the AI debate has opened up attractive valuation opportunities in long-term compounders – the Trust has positions in both S&P Global and LSEG.

3 December 2025

Performance relates to past returns and is not a reliable indicator of future returns.

It should not be assumed that recommendations made in future will be profitable or will equal performance of the securities in this document. A list of all recommendations made within the immediately preceding 12 months is available upon request.

Risks

- Investors' capital is at risk and there is no guarantee the Company will achieve its objective.
- Past performance is not a reliable guide to future performance.
- The value of investments may go down as well as up.
- Investors might get back less than they originally invested.
- The value of an investment's assets may be affected by a variety of uncertainties such as (but not limited to): (i) international political developments; (ii) market sentiment; and (iii) economic conditions.
- The shares of the Company may trade at a discount or a premium to Net Asset Value.
- The Company may use derivatives which carry the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions.
- The Company invests in assets denominated in currencies other than the Company's base currency and changes in exchange rates may have a negative impact on the value of the Company's investments.
- The Company invests in a concentrated number of companies based in one sector. This focused strategy can lead to significant losses. The Company may be less diversified than other investment companies.
- The Company may invest in emerging markets where there is a greater risk of volatility than developed economies, for example due to political and economic uncertainties and restrictions on foreign investment. Emerging markets are typically less liquid than developed economies which may result in large price movements to the Company.

Glossary

Active Share, a measure of how actively a portfolio is managed, is the percentage of the portfolio that differs from its benchmark. It is calculated by deducting from 100 the percentage of the portfolio that overlaps with the benchmark. An active share of 100 indicates no overlap with the benchmark and an active share of zero indicates a portfolio that tracks the benchmark.

Alpha is the excess return on an investment in the Company compared to the benchmark and can be used as a measure of performance, where the benchmark is considered to represent the market's movement as a whole.

Derivatives are instruments whose value is linked to another investment, or to the performance of a stock exchange or to some other variable factor, such as interest rates.

Discount is where the share price of an investment company is lower than the net asset value per share.

Discrete Performance is the percentage performance of an investment over specific, defined time periods.

Emerging markets are countries that are progressing toward becoming advanced, usually shown by some development in financial markets, the existence of some form of stock exchange and a regulatory body.

Gearing is all external borrowings of the Company and any subsidiaries.

Management Fee is the entitlement of the Investment Manager to an annual management fee. Please see the Explanation of Fee Arrangements available on the Company's website for further information, found at: https://www.polarcapitalglobalfinancialstrust.com/Key-Information/#/Overview

"NAV" or **"Net Asset Value"** has the value of all assets of the Company less liabilities to creditors (including provisions for such liabilities) determined in accordance with the Company's accounting policies, applicable accounting standards and the Company's constitution.

Ongoing Charges are the measure of what it costs to run the Company, including the Management Fee and other operating costs; these costs are not passed on to investors in the price they pay for the shares of the Company.

Premium is where the share price of an investment company is higher than the net asset value per share.

For a complete glossary of investment terms, please refer to the Trust's website: https://www.polarcapitalglobalfinancialstrust.com/Glossary/

Important Information

Not an offer to buy or sell This document is not an offer to buy or sell or a solicitation of an offer to buy or sell any security, and under no circumstances is it to be construed as a prospectus or an advertisement. This document does not constitute, and may not be used for the purposes of, an offer of the securities of, or any interests in, the Company by any person in any jurisdiction in which such offer or invitation is not authorised.

Information subject to change Any opinions expressed in this document may change.

Not Investment Advice This document does not contain information material to the investment objectives or financial needs of the recipient. This document is not advice on legal, taxation or investment matters. Prospective investors must rely on their own examination of the consequences of an investment in the Company. Investors are advised to consult their own professional advisors concerning the investment.

No reliance No reliance should be placed upon the contents of this document by any person for any purposes whatsoever. None of the Company, the Investment Manager or any of their respective affiliates accepts any responsibility for providing any investor with access to additional information, for revising or for correcting any inaccuracy in this document.

Performance and Holdings All data is as at the document date unless indicated otherwise. Company holdings and performance are likely to have changed since the report date. Company information is provided by the Investment Manager.

Benchmark The Company is actively managed and uses the MSCI ACWI Financials Net TR Index as a performance target. The benchmark has been chosen as it is generally considered to be representative of the investment universe in which the Company invests. The performance of the Company is likely to differ from the performance of the benchmark as the holdings, weightings and asset allocation will be different. Investors should carefully consider these differences when making comparisons. Further information about the benchmark can be found www.msci.com.

Third-party Data Some information contained in this document has been obtained from third party sources and has not been independently verified.
